multiVISION Display

IP 65

multiVISION Display is a versatile display enclosure made from aluminum profiles. The enclosures are available in nine depths using a combination of three different case profiles. Each enclosure is made to order to the exact customer width and height requirements and machined with holes and cutouts to suit. The front panel can be used to mount various assemblies including membrane keypads, displays and touch panels. Hinges and a lock can be fitted to the rear for quick access inside. An optional handle system enables easy positioning when the unit is fitted to a suspension arm.

multiVISION Display is compatible with all ROLEC suspension arm systems.

Enclosure sizes
Made to customer required sizes
L x W x H max. 31,49" x 31,49" x 14,17"

Additional info
Versatile display and operating enclosure
Articulated front and rear wall door
Dimensions as per customer requirements
Assembly of front plates without visible screws

Enclosure
Extruded aluminum

Door: Aluminum corner pieces mounted with aluminum profiles
Standard front plates: Aluminum 3 mm, Al Mg 1, silver anodized
Optional: Finished front plates, bored, stamped, engraved or printed
Membrane keypads ready for installation

Optional handle frame: Steel pipe, powder coated, RAL 3020, traffic red or RAL 9005, deep black
