

aluNORM

THE MULTIVARIABLE ENCLOSURE

IP 66, Optional: IP 67

The key product features:

- Enclosure material: diecast aluminium
- Enclosure surface: powder coating, RAL 7035
- Single-channel mounting for greater installation volume
- Sizes compatible with polyTOP polyester enclosures, therefore easy to exchange
- Lid screws in stainless steel 1.4567
- Enclosure seal: TPE moulded or PUR gasket, silicone-free

aluNORM IP 66 diecast aluminum enclosures are designed to protect electrical and electronic components. The enclosures are available in four different versions with different lid and base combinations. This gives a huge variety of sizes and design options to choose from.

Uniquely, aluNORM enclosures are mounted to a wall or machine using the same screw channels as the lid fixings. This means there is more space inside for your assemblies and components. RFI/EMI shielded versions are also available for the AS and AD variants, and some AF and AH variants - see ordering details. Threaded screw bosses in the lid and base enable fast installation of terminal rails, mounting plates etc. Matching cable glands and accessories are also available.

We can supply aluNORM enclosures fully customized to your requirements.

Enclosure sizes

86

Additional info

4 different variants

AS (deep bottom, flat lid)

AD (flat bottom, deep lid)

AF (flat bottom, flat lid)

AH (deep bottom, deep lid)

Compatible assembly dimensions with the polyTOP range (polyester enclosure)

Optional: Specially developed external mounting brackets made from die-cast aluminum, available from AS

080

Enclosure

Diecast aluminum

EN AC 44300/EN AC-44200 (DIN EN 1706)

1° mold slope for casting ejection > internal circumference dimensions decrease by 1° towards enclosure bottom.

Fastening

Space-saving single-channel technology for lid and fastening screws outside of the enclosure interior
Even square enclosures can be screwed into any position without problems, thanks to the symmetrical arrangement

Internal mounting

Fastening thread in lateral bars on the floor of the enclosure and a fastening option and/or thread in the lid
(both depending on the variant)
Mounting plate made from galvanised sheet steel available as an accessory

Ingress protection

IP 66 / EN 60529
Optional: IP 67 / EN 60529

Gasket

TPE moulded or PUR gasket, silicone-free

Lid screws

Stainless steel 1.4567, captive

Surface

Powder coating RAL 7035 light grey
Optional: Special colors
Optional: Corrosion protection

Customizing
